Product Description

Waterproof PU Moistureproof Roof Wall Polyurethane Sandwich Panel Customized Surface

Product Description:

Polyurethane Sandwich Panel is a kind of modern design wall panel, with the advantages of reasonable price, light weight and good heat insulation performance. It is composed of two steel plates with thickness of 0.4mm-0.8mm and a polyurethane insulation core. The thickness of the panel can be customized from 50mm to 200mm, and other sizes are also available. It is an ideal choice for wall and roof panel of different industries. Pu insulation polyurethane sandwich panel and polyurethane sandwich wall roof panel are the most popular products in the sandwich panel industry.

Features:

Strong sound insulation
Waterproof and moisture-proof
Class A fire protection
Heat preservation

Applications:

Due to the advantages as heat and sound insulation, high load capacity, light weight, quick movement and easy to install, PU Sandwich Panel are procured with the best prices and used in the buildings whose load-bearing system is of steel and prefabricated concrete, such as industrial buildings, military buildings, social buildings, agricultural buildings, sports facilities, construction sites, silos, supermarkets, shopping malls, cold storage depots and marketplaces.
