Office Steel Structure Frame Welded Flat Pack Container House With Hot And Cold Water System

Product Description:

Container House is a prefabricated and folding house made of shipping containers. It features a contemporary design style and is made of sandwich panel and steel, making it waterproof for the whole house. The windows are made of aluminum alloy and optional furniture is available.

This shipping containers house is a perfect solution for a variety of applications, such as a temporary office, accommodation, mobile office, camp site, etc. It has all the advantages of a prefabricated and folding house, including easy installation, transportation, expandability, low cost, and environmental protection.

Container House is highly customizable and has a variety of options available. Choose from a wide range of furniture and colors to create the perfect home for you! Enjoy the convenience of a folding container house today!

Features:

Low construction cost: Compared with traditional brick-concrete structure houses, the construction cost of container houses is lower. This is because containers can be produced in a production line and can be stacked together during transportation, reducing transportation costs and space occupancy.

Strong durability: The main structure of the container house is composed of steel materials, which has very strong durability and wind resistance and earthquake resistance. At the same time, the shell of the container house is treated with special anti-corrosion treatment to prevent rust and corrosion.

Strong spatial plasticity: Because the size and shape of the container house can be adjusted according to needs, it has strong spatial plasticity. The area of the house can be extended or reduced by splicing, stacking, etc.

Simple and fast: the construction speed of container houses is very fast, and it can be completed after several links such as prefabrication, processing, and assembly. At the same time, due to its modular design, disassembly and migration are also very convenient.

Environmental protection and energy saving: the materials of container houses can be recycled and reused, and will not produce a lot of construction waste, while energy consumption and carbon emissions can be reduced by improving insulation materials and adopting new energy equipment.

Applications:

BAODU's Container House is the perfect solution for a variety of applications such as office building, expandable container house, prefabricated container house, shipping containers house, container home and container house for sale. It is designed with a contemporary style, and is made with high quality materials to ensure quality and durability. It has hot and cold water systems, and furniture can be added optionally. The minimum order quantity is discussible, and the price is reasonable. The packaging is secure and can be customized according to the customer's requirements. Delivery time is 15days, and payment terms include L/C, D/A, D/P, T/T, Western Union, and MoneyGram. BAODU has a weekly supply capacity of 100 units, and provides online technical support for after-sales service.

Support and Services:

Container House provides comprehensive technical support and service. Our experienced team of technical experts is available around the clock to provide you with the best possible service. We provide a full range of services, including troubleshooting, installation, maintenance, upgrades, and more. Our technical team is knowledgeable and experienced in all aspects of Container House products and can provide you with the support you need.

Packing and Shipping:

Packaging and Shipping of Container House

Container houses are shipped via flatbed truck or trailer. The container house is securely strapped to the flatbed to ensure there is no movement during transit. The container house is then transported to the desired location and unloaded at the site. The container house is then lifted onto the foundation and secured.
