- Supply Ability: 40000 Ton/Tons per Month

Product Specification

- Product Name: BAODU Modern Steel Floor Decking 0.8mm-3.0mm With High Corrosion Resistance
- Material: Steel
- Type: Floor Decking
- Coating: Customized
- Durability: Long
- After-sale Service: Online Technical Support, Free Spare Parts
- Anti-slip: Yes
- Bending Strength: High
- Tensile Strength: High
- Keyword: Steel Floor Decking
- Highlight: **Antislip composite metal floor decking, composite metal floor decking Slab, Composite metal deck floor slab**

BAODU Modern Steel Floor Decking 0.8mm-3.0mm With High Corrosion Resistance

Product Description:

Steel Floor Decking

Steel Floor Decking is a kind of steel deck for steel structure building, which is made of premium steel material and is designed to provide strong, reliable and durable support for the steel structure building. It has great fire resistance and high sound insulation, making it a perfect choice for steel structure building.

Steel Floor Decking offers a high tensile strength, making it a reliable and resilient product that can provide long-term support for steel structure building. It is easy to install and maintain, and comes with online technical support and free spare parts, making it a great choice for steel structure building.

If you are looking for a reliable and durable steel deck for steel structure building, Steel Floor Decking is definitely the right choice for you. It offers great fire resistance, high sound insulation, high tensile strength and long-term durability, making it a perfect choice for your steel structure building.

Features:

- Formwork for non-composite RCC floor and roof slabs
- Optimised cover width for speed of installation
- Flexible side-lap detail for control of cover width

Applications:

BAODU Steel Floor Decking is a kind of popular metal floor decking sheet for both commercial and residential buildings. It is made of high-quality galvanized steel with thickness range from 0.8mm to 3.0mm. The surface of this floor decking sheet is galvanized, which can make it long-term durability and anti-corrosion. The steel floor decking panel is also available in various colors like silver.

BAODU Steel Floor Decking is widely used in commercial and residential buildings for roof decking, floor decking, wall cladding, etc. The steel floor decking sheet can be used for multi-story buildings, theaters, gymnasiums, car parks, and large-span steel structures. It can also be used for steel floor decking, sheet metal roof, and wall cladding. We provide a wide range of steel floor decking panel to meet your needs and requirements.

Support and Services:

Steel Floor Decking provides technical support and service to customers in the form of an online resource center. This center includes product information, installation manuals, product specifications, technical tips, and a frequently asked questions page for customers to get the most out of their purchase. Customers can contact the support staff directly via email, phone, or live chat for personalized assistance. Additionally, Steel Floor Decking offers extended warranties and repair services to ensure customers receive the best possible service.

Packing and Shipping:

Packaging and Shipping Steel Floor Decking

Steel floor decking is packaged and shipped in bundles for easy handling and quick delivery. The bundles are secured with straps and the ends are sealed to prevent any shifting of the contents during transit. All bundles are then palletized for easy shipment and loading.

The pallets are then shrink-wrapped for extra protection against the elements. All products are labeled and documented on the pallets for easy identification. The paperwork includes product identification, quantity, weight, and other pertinent information.

All shipments are sent via ground transportation or air freight, depending on the customer's needs. The shipping container is carefully packed with appropriate cushioning materials to ensure the product arrives at its destination in perfect condition.

BAODU:

Baodu International Advanced Construction Material Co., Ltd was established in January 2010 with the office in Beijing and factory in Hebei, China. Baodu is a designer, manufacturer, supplier and exporter of industrial noise comprehensive treatment, steel structure, sandwich panel and prefab house. Baodu has an annual output of 6 million square meters of acoustic sandwich panels, 100000 tons of steel structures and 1 million square meters of floor decking sheet. The products are sold in more than 30 countries and regions around the world. Baodu has a professional design team with more than 10 years' experience, including 5 senior engineers, 20 engineers, and 35 technicians. Baodu has several energy saving and environment protection intellectual property rights, construction and environment protection design qualification, CE certification and Russian GOST certification etc. Baodu participated in the military parade village project for the 60th anniversary of China and project of Beijing Daxing International Airport. Under the guidance of China's "one belt, one road" strategy, Baodu has also undertaken overseas projects such as the project of Thar, Pakistan coal fired power plant, Hasyan Dubai power plant and so on. Finally, welcome your coming to Baodu for a visit and cooperation!
