Product Description

Aluminum Siding Stainless Steel Facade Metal Cladding Systems Exterior Wall Covering Building Construction

Product Description:

Steel Wall Cladding is a revolutionary wall siding system designed for superior protection against corrosion and rust. It is constructed with steel plate, aluminum, and stainless steel, making it incredibly durable and resistant to the elements. This system is perfect for any building needing increased resistance to corrosion and rust. Its superior corrosion resistance makes it an excellent choice for both residential and commercial buildings. The Steel Wall Sheet System is easy to install, making it a cost-effective solution for any building. Additionally, its sleek design and wide variety of colors and finishes make it an attractive decorative option. With Steel Wall Cladding, you can be sure that your building is protected from corrosion and rust.

Features:

1. Easy to Install

The installation of colour steel sheet is very convenient and quick because the painted wall panel itself is very light in weight. Also, there is no need for a deep foundation. So it can greatly shorten the construction period.

2. Short Construction Period

Traditional construction requires much water to make the mortar for bricklaying. After that, it takes time to dry. But using colored steel for wall panels, the building can be put into use once it is finished.

3. High Durability

Steel wall cladding can effectively protect buildings from corrosion because of coatings. And the color almost does not fade after exposure to the sun. The service life of colour steel wall panels on the market is at least 15 years under normal conditions.

4. Great Thermal Insulation

Colored wall panels are with thermal insulation, which makes it a great choice for outer walls.

5. Safety

The surface materials and insulation materials of colored wall panels are non-combustible, which can meet the requirements of fire prevention regulations.

6. Fair Price

The color steel wall sheeting is cost-effective. Compared with traditional construction materials, it offers many advantages, like fast production, light in weight, and quick installation, which will shorten the construction period to reduce your cost.

Technical Parameters:

Keyword	Steel Wall Cladding System, Metal Wall Cladding System, Steel Wall Protection System
Product Name	Aluminum Siding Stainless Steel Facade Metal Cladding Systems Exterior Wall Covering Building Construction
Material	Steel Plate; Aluminum; Stainless Steel
Density	7.85
Color	Various Colors
Corrosion Resistance	Excellent
Standard	AISI,ASTM,GB,JIS
Feature	Decoration Anti-corrosive Anti-rusty
After-sale Service	Online Technical Support, Onsite Installation
Formability	Good

Applications:

Steel Wall Cladding System from BAODU

BAODU's Steel Wall Cladding System offers a wide range of benefits for your commercial or residential building. This durable wall cladding is available in various materials, such as steel plate, aluminum, and stainless steel. With its good formability and low maintenance, our wall cladding system can provide your building with protection from corrosion, rust, and other environmental factors. It is also a great way to add decorative elements to your building, such as texture, color, and pattern.

Our colored steel wall panels will allow you to meet different standards for agricultural, industrial, and residential buildings, such as schools, hospitals, apartments, offices, museums, warehouses, theaters, and other buildings. It has features as follow:

1. Offer you multiple attractive options from color, design, specification, etc.
2. High durability and excellent corrosion resistance
3. Easy and fast installation, which can save your construction costs
4. Less maintenance to reduce your cost
