

Certified PU Polyurethane Insulated Roof And Wall Sandwich Panel For Cleanroom Peoject

Our Product Introduction

for more products please visit us on baodupanel.com

Basic Information

- Place of Origin: Hebei,China
- Brand Name: BAODU
- Certification: CE
- Model Number: Polyurethane Sandwich Panel
- Minimum Order Quantity: Discussible
- Price: Reasonable
- Packaging Details: In general, for steel structure , we use the steel frame packing to keep goods not to be broken . For sandwich panel and color steel sheet, we use the plastic packing . If the clients need special packing will according to their requirements.
- Delivery Time: 15days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 5000 Square Meters per Day

Product Specification

- Product Name: Certified PU Polyurethane Insulated Roof And Wall Sandwich Panel For Cleanroom Peoject
- After-sale Service: Online Technical Support
- Heat Insulation: Yes
- Color: RAL Color;Customized
- Soundproof: Yes
- Keyword: PU Sandwich Panel
- Width: 1000mm
- Design Style: Modern
- Highlight: **10mm PU Sandwich Panel, Advanced Heat Insulation PU Sandwich Panel, RAL Color PU Sandwich Panel**

Certified PU Polyurethane Insulated Roof And Wall Sandwich Panel For Cleanroom Peoject

Product Description:

One of the most notable features of this product is its excellent heat insulation capabilities. The Polyurethane Sandwich Panel's polyurethane foam core acts as an insulator, providing thermal resistance and reducing energy consumption. This makes it easier for building owners to maintain comfortable indoor temperatures without relying too much on their cooling or heating systems.

As a sandwich panel, the Polyurethane Sandwich Panel has a unique composition. It consists of an outer and inner skin, with the polyurethane foam core sandwiched in between. These skins are made of high-quality materials that are both durable and weather-resistant. Additionally, the surface can be customized according to the customer's preference, allowing for greater design flexibility.

Another advantage of the Polyurethane Sandwich Panel is its moisture-proof feature. The panel's polyurethane foam core is closed-cell, preventing water from seeping in and causing damage. This makes it an ideal choice for buildings located in areas with high humidity or those that are prone to rain or flooding.

The Polyurethane Sandwich Panel is also easy to install, reducing labor costs and installation time. Its lightweight construction makes it easy to handle, while its interlocking design ensures a secure and tight fit. This means that building owners can have their structures up and running in no time.

The Polyurethane Sandwich Panel is a cost-effective solution for building insulation and cladding needs. Its excellent thermal insulation properties, moisture-proof feature, and customizable surface make it a popular choice for both residential and commercial projects. Whether you're looking to insulate your home or office building, the Polyurethane Sandwich Panel is a reliable and efficient choice.

Overall, the Polyurethane Sandwich Panel is a versatile and practical product that offers a range of benefits. Its polyurethane foam core provides excellent heat insulation, while its moisture-proof feature makes it ideal for areas with high humidity. Its customizable surface and easy installation also make it a popular choice for builders and architects. If you're in need of a reliable and efficient sandwich panel solution, the Polyurethane Sandwich Panel is definitely worth considering.

Features:

Product Name: PU Roof Wall Sandwich Panel

Color: RAL Color: Customized

Material: Polyurethane

Surface: Customized

Type: Polyurethane Sandwich Panel

Technical Parameters:

| | |
|--------------------|---|
| Product Name | Certified PU Polyurethane Insulated Roof And Wall Sandwich Panel For Cleanroom Peoject |
| Type | Sandwich Panels Polyurethane, PU Roof Wall Sandwich Panel, PU Roof Wall Sandwich Panel |
| Thickness | 50mm-200mm, etc |
| Surface | Customized |
| Design Style | Modern |
| Density | 40-42kg/m3 |
| Soundproof | Yes |
| Length | Customizable According To Customer Needs |
| Price | Reasonable |
| After-sale Service | Online Technical Support |

Applications:

Polyurethane sandwich panels have the advantages of efficient heat preservation, fire protection, long service life, beautiful atmosphere, easy installation, etc.

They are widely used in cold storage, fresh-keeping rooms, various purification rooms, air conditioning rooms, steel structure workshops, fire protection workshops, warehouses, prefabricated houses, chicken houses, farm buildings, etc

Support and Services:

1. Construction pre-engineered and fewer components, internationally accepted and meets the building code specifications
2. Higher energy savings due to low thermal conductivity
3. Flexibility in design and choosing various options on fascia of panels and colours
4. All weather proof construction and Maintenance free
5. These insulated panels gives long lasting value with controlled quality, accuracy & speed of construction and caters for better functionality and application.

Packing and Shipping:

Product Packaging:

The Polyurethane Sandwich Panels will be packaged in bundles with plastic wrapping and steel straps to ensure safe transportation and prevent damage during shipping.

Shipping:

The panels will be shipped via truck or container depending on the quantity ordered. Customers will be provided with a tracking number to monitor the shipment and ensure timely delivery.

FAQ:

Q: What is the brand name of the product?

A: The brand name of our product is BAODU.

Q: What is the model number of the product?

A: The model number of our product is Polyurethane Sandwich Panel.

Q: Where is the product made?

A: Our product is made in Hebei, China.

Q: What certifications does the product have?

A: Our product is CE certified.

Q: What are the payment terms for the product?

A: We accept payment terms such as L/C, D/A, D/P, T/T, Western Union, and MoneyGram.

Q: What is the delivery time for the product?

A: Our delivery time for the product is 15 days.
