

Triangular Iron Stainless Steel Angle Steel Customizable For Structural Support

Our Product Introduction

for more products please visit us on baodupanel.com

Basic Information

- Place of Origin: Hebei, China
- Brand Name: BAODU
- Certification: ISO9001:2008, SGS
- Model Number: Angle Steel
- Minimum Order Quantity: 1 ton
- Price: Reasonable
- Packaging Details: Export standard packing or according to customers' requirement
- Delivery Time: 21 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 40000 Ton/Tons per Month

Product Specification

- Features: High Strength/Corrosion Resistant
- Product Name: Stainless Steel Angle Bar Triangular Iron Customizable Stainless Steel Angle Steel For Structural Support
- Thickness: Customizable
- Shipping: Shipped By Container/break Bulk
- Width: Customizable
- Technique: Hot Rolled
- Application: Construction/Structural Support
- Surface Treatment: Galvanized/Coated
- Highlight: **Customizable Stainless Steel Angle Bar, Structural Support Stainless Steel Angle Bar, Triangular Iron Stainless Steel Angle Bar**

Stainless Steel Angle Bar Triangular Iron Customizable Stainless Steel Angle Steel For Structural Support

Product Description:

The Steel Angle product is shipped by container or break bulk, depending on the customer's preference. This ensures that the product arrives at the customer's location in perfect condition, without any damage. The Steel Angle product is suitable for use in various construction and manufacturing applications, such as framing, supports, bracing, and reinforcement. The Steel Angle product is available in different sizes and widths, making it customizable to meet the specific needs of various projects. The width can be adjusted to fit the requirements of the customer, ensuring that the product fits perfectly into the intended application. The Steel Angle product is manufactured using the hot-rolled technique, which involves heating the metal to high temperatures and then rolling it into the desired shape. This technique ensures that the product is durable and has a smooth surface, making it easy to work with. The Steel Angle product is also easy to weld, cut, and form, allowing for easy customization to fit specific project requirements. One example of the Steel Angle product is the L angle steel bar with a hole for construction. This product is specifically designed for use in construction applications, where it is used to anchor and support various structures. The L angle steel bar with a hole is ideal for use in concrete reinforcement, as it provides a strong and stable base for concrete structures. In summary, the Steel Angle product is a versatile and durable construction material that is widely used in various industries. It is available in different widths and sizes, making it customizable to meet the specific needs of different projects. The Steel Angle product is shipped by container or break bulk, ensuring that it arrives at the customer's location in perfect condition. It is also known for its high strength and corrosion-resistant properties, making it an ideal material for outdoor and indoor applications. Lastly, the Steel Angle product is manufactured using the hot-rolled technique, which ensures that it is durable and easy to work with.

Features:

Product Name: Steel Angle

Thickness: Customizable

Features: High Strength/Corrosion Resistant

Shipping: Shipped By Container/break Bulk

Technique: Hot Rolled

Material: Steel

Looking for a stainless steel tile angle? Our Steel Angle product is made with high strength and corrosion resistant steel, customizable to your desired thickness. It is shipped by container or break bulk and is made using the hot rolled technique. This material angle steel cut structural galvanized is perfect for your construction needs.

Technical Parameters:

Type	ASTM A36 A53 Q235 Q345 Carbon Equal 2 Inch Angle Steel Galvanized Iron L Shape 250x250 Mild Steel Angle Bar	
Standard	GB/T9787-88, JIS G3192:2000, JIS G3101:2004, BS EN10056-1:1999, BS EN10025-2:2004	
Materials	Q235B, Q345B, SS400, SS540, S235JR, S235JO, S235J2, S275JR, S275JO, etc.	
Thickness	3-24mm	
Length	1-12 m, or as requirements	
Equal Angle	Size	20-200mm
	Weight	0.597-71.168kg/m
Unequal Angle	Size	25*16-200*125mm
	Long Side	20-200mm
	Short Side	16-125mm
	Weight	1.687-43.588kg/m
Surface Treatment	oil, black, galvanized, painted	
Technique	hot rolled/cold rolled/galvanized	
Packing	with bundle, as per standard seaworthy package or as customer's requirement	
Application	widely used in various building structure and engineering structure, such as the beam, bridges, transmission tower, lifting transportation machinery, ship, industrial furnace, reaction tower and container frame etc.	

Applications:

One of the most common applications of steel angle is in the construction industry. It is often used to provide structural support for buildings and other structures. The angle can be used to reinforce corners and edges, and to provide added strength to load-bearing walls. BAODU Steel Angle is a popular choice for construction projects due to its strength, durability, and reasonable price.

Another common use for steel angle is in manufacturing. It can be used to create frames for machinery and equipment, as well as to provide support for conveyor systems and other industrial applications. BAODU Steel Angle is available in stainless steel and carbon steel, making it suitable for a wide range of manufacturing applications.

Steel angle can also be used in the transportation industry. It can be used to create frames and supports for vehicles and trailers, and to provide added strength to bridges and overpasses. BAODU Steel Angle is certified by ISO9001:2008 and SGS, ensuring that it meets the highest standards of quality and safety.

BAODU Steel Angle is available in a range of dimensions, from 20*20mm to 200*200mm, and can be customized to meet specific thickness and weight requirements. The product is available in export standard packing or according to customers' requirements, and has a minimum order quantity of 1 ton. With a supply ability of 40000 Ton/Tons per month, BAODU Steel Angle is a reliable and efficient choice for any project.

In summary, BAODU Steel Angle is a versatile and durable product that can be used in a variety of applications. Whether you are working in construction, manufacturing, transportation, or any other industry, steel angle can provide the structural support and added strength you need. With a reasonable price, customizable dimensions, and a range of certifications, BAODU Steel Angle is a top choice for any project.

Support and Services:

Our Steel Angle product comes with reliable technical support and services to ensure the best possible user experience:

Packing and Shipping:

FAQ:

Q1: What is the brand name of the steel angle product?

A1: The brand name of the steel angle product is BAODU.

Q2: What is the minimum order quantity for the steel angle product?

A2: The minimum order quantity for the steel angle product is 1 ton.

Q3: What are the payment terms for purchasing the steel angle product?

A3: The payment terms for purchasing the steel angle product are L/C, D/A, D/P, T/T, Western Union, and MoneyGram.

Q4: What is the delivery time for the steel angle product?

A4: The delivery time for the steel angle product is 21 days.

Q5: What is the supply ability for the steel angle product?

A5: The supply ability for the steel angle product is 40000 Ton/Tons per Month.
