Our stainless angle steel product is made to the highest standards of quality and durability, ensuring that it will stand up to even the toughest conditions. So why wait? Order your angle bracket steel today and see the difference for yourself!

Features:

Product Name: Steel Angle

Dimensions: 20*20--200*200mm

Use: Beam, Bridge, Transmission Tower, Ship Etc

Shape: Right Angle

Application: Construction/Structural Support

Normal Length: 1-12m Or As Request

Features:

Can be used as steel angle with holes for easy installation

Also known as angle iron steel

Competitive steel angle price per ton

Technical Parameters:

Name	Profile steel angle steel bar
Size	25*3 mm-200*24 mm
Theoretical weight	1.124 kg/m-7 1.86 kg/m
Packing	Export standard packing or according to customers' requirement
Certificate	ISO9001:2008
Shipment	Within 10-15 workdays,25-30 days when the quantity beyond 1000 tons

Applications:

One of the most common applications for angle steel is in construction. This product is used to create frames for buildings, bridges, and other structures, thanks to its high strength and durability. It is also used to create support structures for equipment and machinery, making it an essential component of many different types of industrial projects.

Angle steel is also commonly used in the manufacturing industry. This product is often used to create brackets, supports, and other components for machinery and equipment. It is also used in the production of agricultural equipment, such as plows and cultivators.

Another popular application for angle steel is in the transportation industry. This product is used to create frames and support structures for vehicles, as well as to create guardrails and other safety features for roads and highways.

The BAODU Angle Steel is a popular choice for many different types of projects, thanks to its high quality and reliability. It is available in a range of different sizes and thicknesses, making it easy to find the perfect product for your needs. And with its galvanized or coated surface treatment, you can be sure that your angle steel bar will be protected from corrosion and other types of damage.

If you need angle steel for your next project, look no further than BAODU. With ISO9001:2008 and SGS certifications, you can be sure that you are getting a product that is both reliable and of high quality. And with a minimum order quantity of just 1 ton and a supply ability of 40000 Ton/Tons per month, you can get the angle steel you need quickly and easily. Plus, with reasonable pricing and a range of different packaging options available, you can be sure that you are getting the best value for your money.

So why wait? Contact BAODU today to learn more about our angle steel and how it can be used in your next project.
