Product Description

Modular Cleanroom Sandwich Wall Panel Walkable Panel for Food/Pharmaceutical Workshop Clean Room

Product Overview-----

The cleanroom walls manufactured by baodu are made using innovative materials conceived for use in controlled contamination environments. The "sandwich" panel can be realised with various components both for the external panelling and the internal insulation, which vary according to specific project requirements. Range from false ceilings with a visible 60mm aluminium frame, with panels surface-mounted or flush-fitted to aluminium profiles, to high-load false ceilings (walkable) with a concealed structure. The modules are suitable for housing filters, grilles and lighting fixtures for each size. Advantages - Panel come with steel frame four sides to avoid contamination. -Resistant to chemical, attack abrasion and scratches Clean Room Fabrication. -High quality insulation core materials. -Pre-embedded reinforcement for the opening of light fixture and air filters. -Pre-embedded conduit for wiring. -Advanced design makes all connection smooth, flush and cleanable -Easy and fast installation system. -Finishing Surface can be flush connection as required. -Strong walkable ceiling/ false ceiling
