

Environmental Garage Car Parking System Shelter Durable Prefabricated Storage Shed Warehouse Structure Workshop

Our Product Introduction

for more products please visit us on baodupanel.com

Basic Information

- Place of Origin: Hebei, China
- Brand Name: BAODU
- Certification: ISO9001, CE
- Model Number: Steel Warehouse
- Minimum Order Quantity: Discussible
- Price: Reasonable
- Packaging Details: In general, for steel structure, we use the steel frame packing to keep goods not to be broken. For sandwich panel and color steel sheet, we use the plastic packing. If the clients need special packing will according to their requirements.
- Delivery Time: 15-21 days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 10000 Square Meter/Square Meters per Month

Product Specification

- Product Name: Environmental Garage Car Parking System Shelter Durable Prefabricated Storage Shed Warehouse Structure Workshop
- Warranty: 50 Year
- Keyword: Steel Structure Building Warehouse
- Weather Resistance: High
- Main Frame: Solid H-shape Steel Beam
- Installation: Engineer Guidance
- Purlin: C/Z Galvanized Steel
- Drawing Design: Customers' Request
- Window: Sliding Window, PVC Window Or Aluminium Window
- Processing Service: Bending, Welding, Decoiling, Cutting, Punching

Environmental Garage Car Parking System Shelter Durable Prefabricated Storage Shed Warehouse Structure Workshop

Product Description:

General Class Configuration

Main Structural Type:

Frame structure, Truss structure, Arch structure, Tubular structure, Customized equipment.

Main Component Type:

H-type, Box-type, Cross-type, T-type, Lattice-type, Special-shaped Custom-made, etc.

Secondary Component Type:

Column support, Horizontal support, Tie rod, Stair, Steel truss floor deck, Guardrail, etc.

Cladding System:

C/Z-shaped purlin, Round steel, Corner braces, Casing, etc. Exterior walls often use color steel plate, Sandwich panel, ALC wall panel, Glass curtain wall, Corrugated aluminum plates, etc.

Steel Structure Workshop

The primary difference between the two steel building types is the primary framing system. The primary framing system is the core framing of a building. Welded frame buildings are made with frames from steel flat bars and flat sheet pieces that are welded together. The columns and rafters are typically tapered, being narrow at the foundation and peak and wider at the rafter/column connection.

Steel Structure Workshop

A cold-formed building's main frame is typically both bolted and screwed together using pre-drilled plates. Cold-formed steel buildings can require some cutting/coping and drilling of braces on site. A welded frame steel building's main frame is bolted together with plates already welded in place by our certified welders in our weld shop. Welded frame buildings can require some drilling on site.

Steel Structure Workshop

The quality of the materials used in pre-engineered steel buildings plays a huge role in how long they'll last. When you're checking out options for pre-engineered steel buildings, make sure to look at the quality of the steel, insulation, and roofing materials to ensure they can handle the unique environmental conditions in the region.

1. Primary Framing

Primary Frames are the main load-carrying structural steel components. They may be Clear-span Rigid Frames, Continuous Beam Frames, or Post & Beam Frames. Primary frames are designed in accordance with the steel construction manual published by American Institute of Steel Construction (AISC). Manufacturing dimensional tolerances are in accordance with the requirements of 'Metal Building Manufacturers Association' (MBMA) of USA, "Low Rise Building Systems Manual". Besides AISC and MBMA, we also design buildings with IS-875, 1984 and IS-875, 2007. Built-up sections are fabricated from hot rolled steel plates conforming to ASTM A 572M grade or equivalent with minimum yield strength of 345N/mm² (50ksi). The most common primary framing systems are illustrated here. All structures shown are symmetrical about the ridge line. Framing systems unsymmetrical about the ridge line and Multi span Framing Systems with unequal width modules are possible too. Practically any frame geometry can be erected.

2. Secondary Framing (Bracing, Z and C section purlin)

Purlin, tie bar and bracing are secondary structural members used to support the wall and roof cladding. Secondary members as purlin, tie bar, column bracing and horizontal bracing connect the main frame and help in resisting part of the longitudinal loads that are applied on the building such as wind and earthquake loads. Steel purlin is available in high grade steel conforming to GB/T 2518-2008, Q235B/Q345B Grade or equivalent, available in 1.8 mm. 2.0 mm, 2.2 mm, 2.5 mm and 3.0 mm thickness. The purlin come with a galvanized sheet. Column bracing is a connecting member set between two adjacent columns to ensure the overall stability of the building structure, improve lateral stiffness and transfer longitudinal horizontal force. Column bracing will be round steel or angle steel according to the building need.

3. Steel Decking Floor

The pressed steel plates supporting the floor concrete are called profiled plates, also called floor bearing board.The steel decking board are widely used in multi-storey buildings such as power plant, exhibition hall, steel structure workshop, cement warehouse, steel structure office, airport terminal, railway station, stadium, concert hall, grand theater, large supermarket, logistics center, Olympic venues and sports venues and other steel structure buildings.It can adapt to the main steel structure rapid construction requirements, can provide a firm platform in a short time, and can take flow repetitive construction operation, laid a number of floors decking board, and pouring concrete slab.

Features:

Structure	Part	Specification
Main Structure	Frame Column and Beam	Q355B H/I Section & As drawings
	Welding	Automatic Submerged Arc Welding
	Rust Removing	Shot Blasting
	Surface Processing	Coating or Galvanized
	High Strength Bolt	Grade 10.9
Secondary Structure	Purlin	C/Z Purlin Size from C120-C320,Z100~Z300,
	Angle Brace	Q235B L-Steel
	Cross Brace/X Brace	Q235B Round Pipe
	Tie Bar	Q235B Round Bar
Roof System	Roofing Material	Sandwich Panel-Insulated PU/Glasswool/Rock Wool/EPS 50mm-200mm
	Skylight Panel	1.2mm FRP

	Gutter	Steel Gutter Galvanized/Coated 2.0mm-3.0mm
	Rainspout/Down Pipe	PVC Pipe
Wall System	Wall Material	Sandwich Panel-Insulated PU/Glasswool/Rock Wool/EPS 50mm-200mm
	Accessories	Sealant, Self-tapping Screw etc
	Edge Cover	Color Steel
Ventilator	Unpowered Axial-Flow Ventilator or Monitor Roof	Customizable
Door	Electric Rolling Door/Sliding Door/Access Side Door	Customizable
Window	Aluminum/PVC	Customizable
Crane	1-200 T	Customizable
Packing	Main steel frame without packing load in 40' OT;	
	Roof and wall panel load in 40' HQ!	

Technical Parameters:

Please kindly inform us of the information below if you are interested in our products.

1. Project Progress: Is Land Purchased? Is it licensed by the government?
2. Usage: for warehouse, workshop, showroom, etc.
3. Location: In which country will it be built?
4. Local Climate: Wind speed, Snow load (max. Wind speed)
5. Design: Please provide the design drawing. Or do you need us to design for you?
6. Dimension: Length*width*height

7. Crane Beam: Do you need crane beam inside the steel structure?
8. Roof and Wall: determine the panel material, such as color steel panel, and metal sandwich panel.
9. Windows and Doors: what material, quantity, and type?

Drawing Design

We need the following information to make a design for you: the specifications and use of the steel building, thermal and lighting conditions, window and door requirements, wind/snow load, and whether it has a crane.

- 1 Location (where will be built?) _____country, area
- 2 Size: Length*width*height _____mm*_____mm*_____mm
- 3 wind load (max. Wind speed) _____kn/m2, _____km/h, _____m/s
- 4 snow load (max. Snow height) _____kn/m2, _____mm
- 5 anti-earthquake _____level
- 6 brickwall needed or not If yes, 1.2m high or 1.5m high
- 7 thermal insulation If yes, EPS, fiberglass wool, rockwool, PU sandwich panels will be suggested; If not, the metal steel sheets will be ok. The cost of the latter will be much lower than that of the former.
- 8 door quantity & size _____units, _____(width)mm*_____ (height)mm
- 9 window quantity & size _____units, _____(width)mm*_____ (height)mm
- 10 crane needed or not If yes, _____units, max. Lifting weight _____tons; Max. Lifting height _____m.

Models Design

Our company offers full design and detailing services to every customer.(PKPM, AutoCAD, Tekla).And our design team turns your requirements into clear drawings, offer 3D drawings for installation guidance, and ensures every detail is easily understandable.

We have our own independent architectural design and research institute, with strong design strength and professional design team, and several experts with senior design experience. Technical consultants and technical guides are well-known Chinese structural experts, professors, and national design masters. Working with us can provide you with a unique opportunity to bring a dedicated design team to your project to ensure the highest quality design solutions.

After years of improvement and customer experience, our process ensures that each building is completed in accordance with your needs and expectations.

We can provide :

1.Customization Service

We have a professional design team about 20 people, with 10 years design experience. We can meet your individual needs.

And multi-type steel components, roof and wall panels, doors and windows for choosing.

Products materials

Embedded bolts for foundation

Structure frame for columns or beams

Bracing material

Connected plate

Purlin

Cladding material 1-steel sheet

Cladding material 2-EPS panel

Cladding material 3-glass wool panel

Cladding material 4-rock wool panel

Door option 1-sliding door

Cladding material 2-rolling door

Aluminum window

Water gutter

Water pipe

Sealing material

Ventilation equipment on roof

FRP panel for lighting

Bolts

Steel decking

Stair (if needed)

2. Strict Quality Inspection

With good quality steel material, we have AWS-D1.1/D1.5 welding quality system and professional CWI welding inspector to ensure high quality of the product.

3. Shortest Delivery Time

We have 2 modern factories and 3 production lines with a total area of 150000 square meters to produce. We guarantee a warehouse of 5000 square meters and delivery within 30 days.

4. Production Visualization

We can provide you with picture, video information of all production links, from raw materials to steel processing, the whole process of visual production. You can even video call us to watch workshop production.

5. Packing and Delivery

Container and pallet packing will protect the surface paint or zinc of the steel structures. In order to facilitate your installation, we will mark each component in sequence according to the drawings.

6. Installation Guide

Installation instruction and video will be provide, we can also send our engineers to your site as installation guide, they will teach your people how to build project.

Installation scene: _____

1. Choose steel plate, quality inspection after the start of the material

2. Distinguish the steel plate material, waiting for cutting

3. According to the drawing specification, laser cutting into the corresponding component size

4. Drill holes into some steel plate parts

5. The steel plate was shot blasted to remove rust

6. Start assembling the steel plate and spot welding it

7. Fully welded steel plate, perfect weld ensures the strength and beauty of steel structure

8. Inspect welded steel structure, prepare for galvanizing or painting

9. Spray paint and galvanize steel structure according to technical requirements of drawings

10. Spray paint and galvanize steel structure according to technical

11. Steel structure construction finished effect

12. Exterior wall insulation system construction effect

THREE ways to help you on the installation:

1. We can offer you the manual include the photos and drawings, or some videos for help you on the installation. And you will organize the local people to install it. 93% of our clients finished their houses in this way.
2. We can send our people to your site to guide your people to install. Or send team people (3-5 people) to your site to install for you. This way is most easy way, but you need to pay their round-way tickets, local food, accommodation, transportation, communication and salary, and also their security on the site. Almost 5% of our clients choose this way. And in the normal we will require the order should be more than 100000USD.
3. You can send your people (engineers or the technician) to our co- mpany to study the installation details. 2% of our clients choose this way for their orders.

Strict Quality Inspection Standards

Excellent product quality is our eternal pursuit, and it is also the fundamental reason for us to base ourselves on the global market. BAODU GROUP implements whole-process quality management and strictly supervises every process such as raw material supply, engineering design, steel component manufacturing, installation and construction.

We have established a professional team of quality inspection engineers, introduced internationally leading quality inspection equipment such as German GS1000 vacuum spectrometer and high-frequency infrared carbon sulfur analyzer, established a high-quality product inspection room, and won many awards from China's advanced quality management unit.

In addition, we support testing and certification by SGS, TUV, BV.

Applications:

**MULTI-STOREY BUILDING
IN PHILIPPINES**

**HEAVY WORKSHOP
IN AUSTRALIA**

**STEEL WAREHOUSE
IN GERMANY**

**STEEL BUILDING
IN ZIMBABWE**

**FACTORY WAREHOUSE
IN MALAWI**

**SHOPPING MALL
IN PHILIPPINES**

**PREFABRICATED SHED
IN CANADA**

**PREFAB WAREHOUSE
IN CANADA**

**METAL WORKSHOP
IN INDONESIA**

Steel structure buildings serve a wide range of purposes, including warehouses, workshops, factories, cold storage facilities, high-rise buildings, shopping malls, power plants, distribution centers, pedestrian bridges, steel-structured hotels, prefabricated public schools, sports arenas and halls, car parking centers, airplane hangars and aviation facilities, church buildings and community centers, poultry farms, agricultural buildings and barns, storage sheds, self-storage buildings, greenhouses, garages, commercial buildings, industrial facilities, and much more.

Project Cases:

Gas Turbine Combined Cycle Power Station Expansion Project in Basra Iraq

Clean Coal Fired Power Plant Phase I (4x600mw net) Project in Haseyan Dubai

Our capacity and certification:

Support and Services:

After many years of operation, the Classic Group has grown from strength to strength and made important contributions to the development of the construction industry and the steel structure industry. It is trusted by builders and customers from all over the world.

Our team of experts is available to provide technical support and services for the Prefab Steel Warehouse product.

We offer:

Consultations to help you determine the best solutions for your needs

Customized design services to ensure the warehouse meets your specific requirements

Quality control inspections throughout the production process

On-site installation and assembly services

Maintenance and repair services to keep your warehouse in top condition

Our goal is to provide our customers with reliable, durable, and cost-effective solutions for their storage needs. Contact us for more information on our technical support and services.

Why Choose Us to offer steel structure building:

1. We have a group of professional engineers, most of whom has more than 20 years experiences in architecture field. our company has got a various of experiences in design, manufacture, installation and so on. The work staff have excellent skills. Some of them had helped customers to install the warehouse around the world.
2. We will offer one stop service. construction drawing, calculation sheet will be offered to help you get construction permit. Foundation design could be free made if you need. We could make 3D drawings to show the view. What's more, Installation drawings will be offered and Steel structure column, beams will be marked number on it to help you install.
3. We will send you extra bolts, purlins, panels incase any damage when install.
4. Efficiency is our pursuit. Every inquiry ,emails will be replied immediately. Every questions will be paid high attention.
5. We also have possessed more than 40 sets of large precise and domestically advanced processing equipments, including large gantry planing machines, automatic submerged arc welding machines, assembling machines, slitters, shot blasting machines and soon.
6. We will offer details packing list for every container when load so it will be easier to unload.
7. "Moral personality decides product quality." is our guarantee to the products. "Customers come first." is our everlasting pursuit. Believe your choose, we'll give you a satisfied answer.

Company profile:

Baodu International Advanced Construction Material Co., Ltd was established in January 2010 with the office in Beijing and factory in Hebei, China. Baodu is a designer, manufacturer, supplier and exporter of industrial noise comprehensive treatment, steel structure, sandwich panel and prefab house. Baodu has an annual output of 6 million square meters of acoustic sandwich panels, 100000 tons of steel structures and 1 million square meters of floor decking sheet. The products are sold in more than 30 countries and regions around the world. Baodu has a professional design team with more than 10 years' experience, including 5 senior engineers, 20 engineers, and 35 technicians. Baodu has several energy saving and environment protection intellectual property rights, construction and environment protection design qualification, CE certification and Russian GOST certification etc. Baodu participated in the military parade village project for the 60th anniversary of China and project of Beijing Daxing International Airport. Under the guidance of China's "one belt, one road" strategy, Baodu has also undertaken overseas projects such as the project of Thar, Pakistan coal fired power plant, Hasyan Dubai power plant and so on. Finally, welcome your coming to Baodu for a visit and cooperation!

Packing and Shipping:

1. Packing steel components and pipe into bundles with steel straps;
2. Wrapping the ends of steel components with fabric;
3. Packaging parts in iron boxes.

Regular goods will be transported in 40ft HQ (High Cubic) containers.

If we use 40ft HQ, steel pallets are required to pack the goods, and then the pallets are pushed into the container. When unloading, the entire pallet is pulled out of the container, which can better protect the steel components and quickly unload.

If you have any other special packaging requirements, please let us know.

FAQ:

1. You are manufacture factory or trading company?

A:BAODU Group is a well-known leading enterprise in the industry, choose us, you will get the most professional technical solutions and the most competitive prices, you are welcome to visit at any time.

2. How can you get a quotation for your projects?

A:You can contact us via Alibaba, email, phone, WsApp, etc., we will reply to you as soon as possible.

3. Is your price competitive compared with other companies?

A:Our business objectives are to give the best price with same quality and best quality with the same price. We will do everything we can to reduce your cost and guarantee you get the best product that you paid for.

4. Do you offer designing service for us?

A:Yes, we could design full solution drawings as your requirements. By using AutoCAD, PKPM, MTS, 3D3S, Tarch, Tekla Structures (Xsteel) and etc.

5. How about your quality control?

A:We have a professional quality inspection team and advanced testing equipment. In addition, we support third-party testing, such as SGS, TUV and so on.

6. What is the delivery time?

A: Delivery time depends on order quantities. In general the delivery time to nearest seaport in China will be 30-40 days after receiving deposit.

7. Do you accept container loading inspection?

A: You are welcomed to send an inspector, not only for the container loading, but any time during the production time.

8. Can you send engineers or whole team to install my project?

A: We will provide you with detailed installation drawings and video explanations. If necessary, we will send professional engineers for guidance and experienced technical workers to help with installation.

9. What's the payment terms ?

A: We support T/T or L/C, 30% deposit, 70% balance before delivery.
