Large Span 50m Modern Prefab Steel Structure Warehouse Building Industrial Metal Workshop Factory With ISO Certification

Our Product Introduction

Basic Information

- Place of Origin: Hebei, China
- Brand Name: Baodu
- Certification: CE
- Model Number: Modular Steel Structures
- Minimum Order Quantity: 500 Square Meters
- Price: USD19-30/square meter
- Packaging Details: In General, For Steel Structure , We Use The Steel Frame Packing To Keep Goods Not To Be Broken . For Sandwich Panel And Color Steel Sheet, We Use The Plastic Packing . If The Clients Need Special Packing Will According To Their Requirements.
- Delivery Time: 30days
- Payment Terms: L/C,D/A,D/P,T/T,Western Union,
- Supply Ability: 100000 Square Meter/Square Meters Per Month

Product Specification

- Product Name: Large Span 50m Modern Prefab Steel Structure Warehouse Building Industrial Metal Workshop Factory With ISO Certification
- Application: Workshop Warehouse Farm
- Item Name: Steel Structure Factory
- Environment Protection: Environmental Friendly Material
- Drawing Design: SAP2000/AutOCAD /PKPM /3D3S /TEKLA
- Roof And Wall: Steel Structure, Fiberglass Wool, Rock Wool
- After-sale Service: Online Technical Support, On-Site Installation, Onsite Inspection, Onsite Training
- Project Solution Capability: Graphic Design, 3D Model Design, Total Solution For Projects, Cross Categories Consolidation
- Processing Service: Bending, Welding, Decoiling, Cutting, Punching
- Window: UPVC Or Aluminum Alloy

Product Description

Product Overview: Large Span 50m Prefab Steel Structure Warehouse

The **PEB prefabricated metal factory building** is a fully custom pre-engineered steel frame plant solution, widely used for manufacturing, warehousing, agricultural farm facilities, and commercial construction projects. PEB (Pre-Engineered Building) adopts an optimized tapered portal frame design; all structural members are engineered, cut, welded, drilled, and anti-corrosion treated inside our factory before shipment. The complete kit is supplied with numbered parts for bolt-on assembly on site, eliminating heavy field welding.

Unlike fixed standard sheds, this steel structure workshop is fully customized according to your site conditions, load requirements, and intended usage. It supports overhead crane installation, large clear spans, insulation systems, ventilation, and daylighting accessories. One building system fits multiple industries: manufacturing production, raw material and finished goods storage, farm barns, poultry and livestock shelters, retail spaces, and warehouse-office combined commercial buildings. It is a versatile, cost-efficient permanent steel building system for global builders, factory owners, farmers, and commercial investors.

Core Competitive Advantages

Optimized PEB Design = Lower Total Cost. The PEB tapered frame design reduces unnecessary steel consumption compared with conventional uniform H-beam steel buildings. Factory prefabrication cuts site labor, waste, and construction time. A shorter project cycle helps you start production, storage, or business earlier and improves capital turnover.

High Safety & Reliable Structural Performance. All projects are calculated according to international standards. The rigid portal frame plus full bracing system delivers excellent wind resistance, snow load capacity, and seismic performance. Suitable for permanent industrial and commercial use, not limited to temporary light sheds.

Fast Assembly & Simple Site Work. All holes are pre-drilled in the factory. On-site work is mainly bolt tightening. No large-scale welding is required for the main frame. Site preparation and factory fabrication can run simultaneously, greatly shortening the overall schedule. Local ordinary construction teams can complete erection with our drawings and guidance.

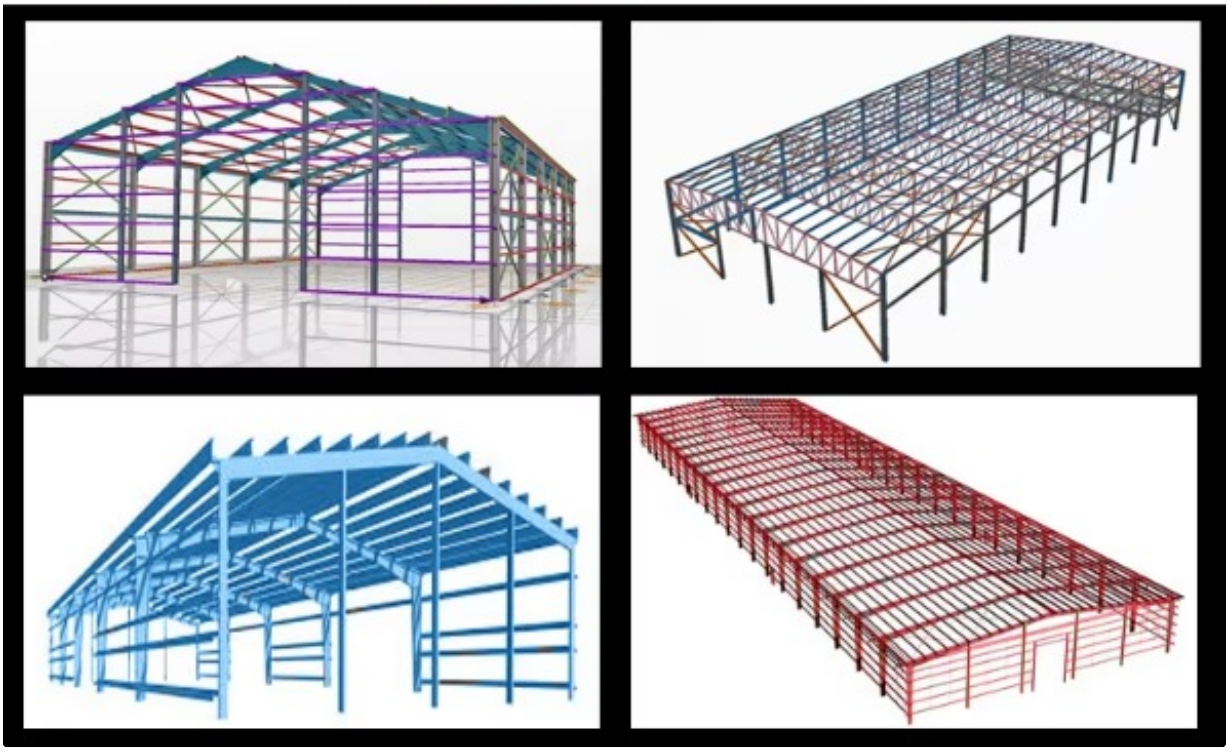

Expandable & Modular Structure. The PEB system supports easy longitudinal extension and mezzanine installation. When your factory expands, inventory grows, or farm scale increases, you can add new bays without dismantling the existing main building. This protects your long-term investment.

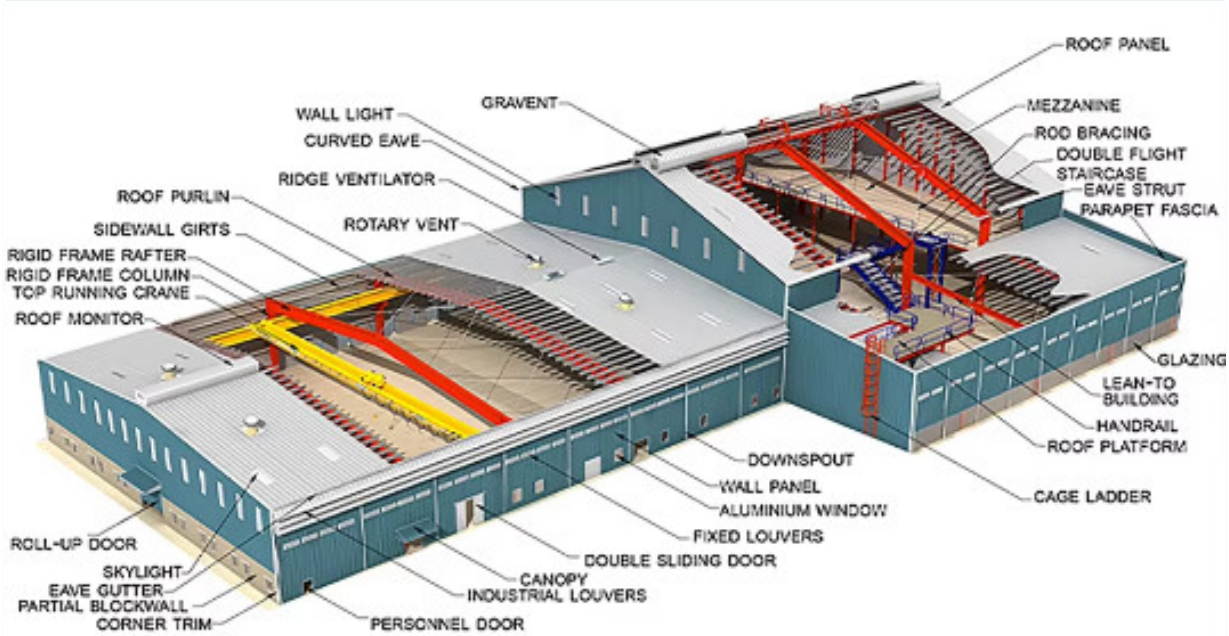

Eco-Friendly & Detachable. Steel materials are 100% recyclable. Bolted connections mean the entire plant can be fully disassembled, relocated, and reassembled if you change sites. Less construction waste than concrete buildings, matching global green building requirements.

Purlin & Column Connection

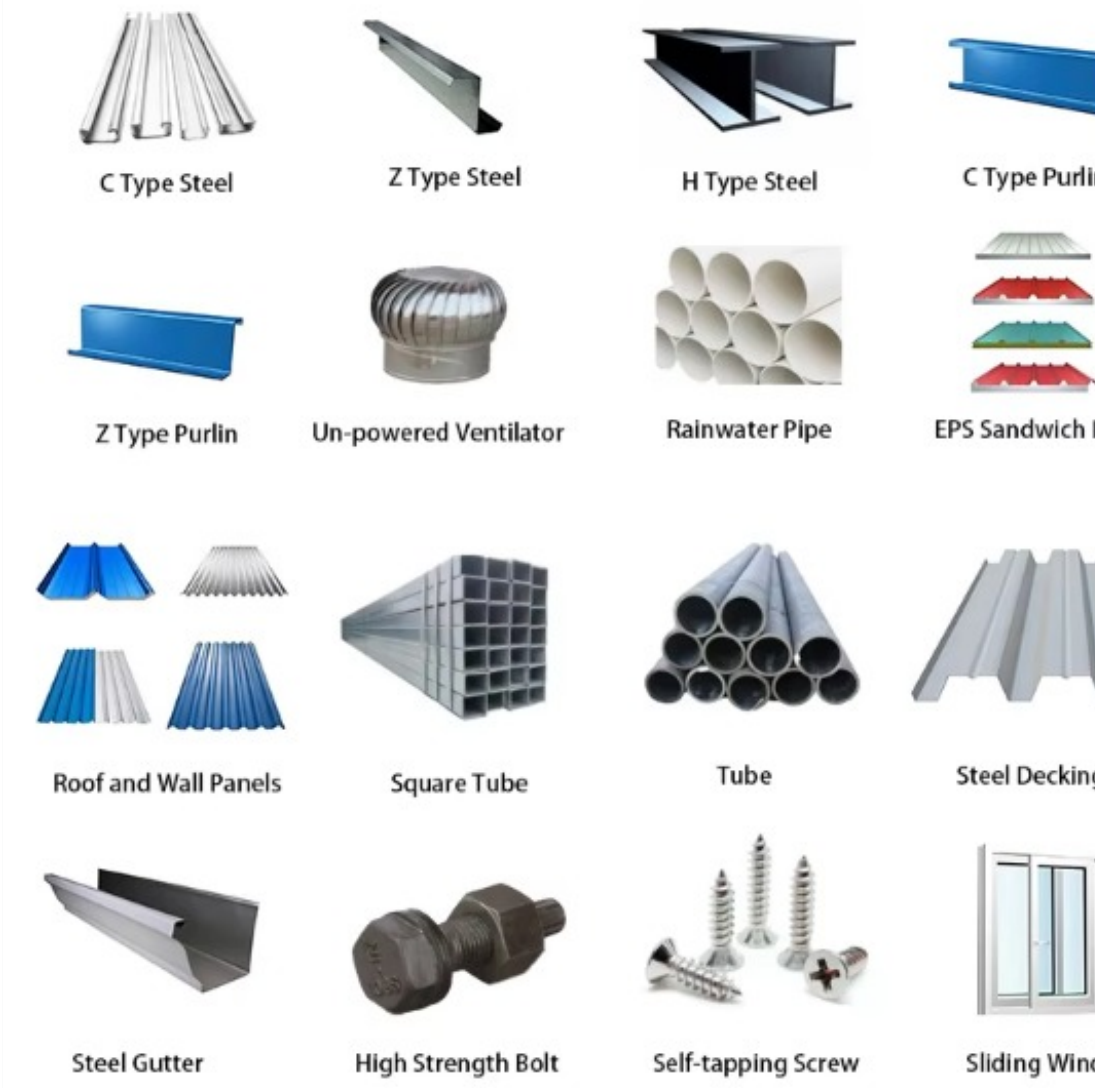

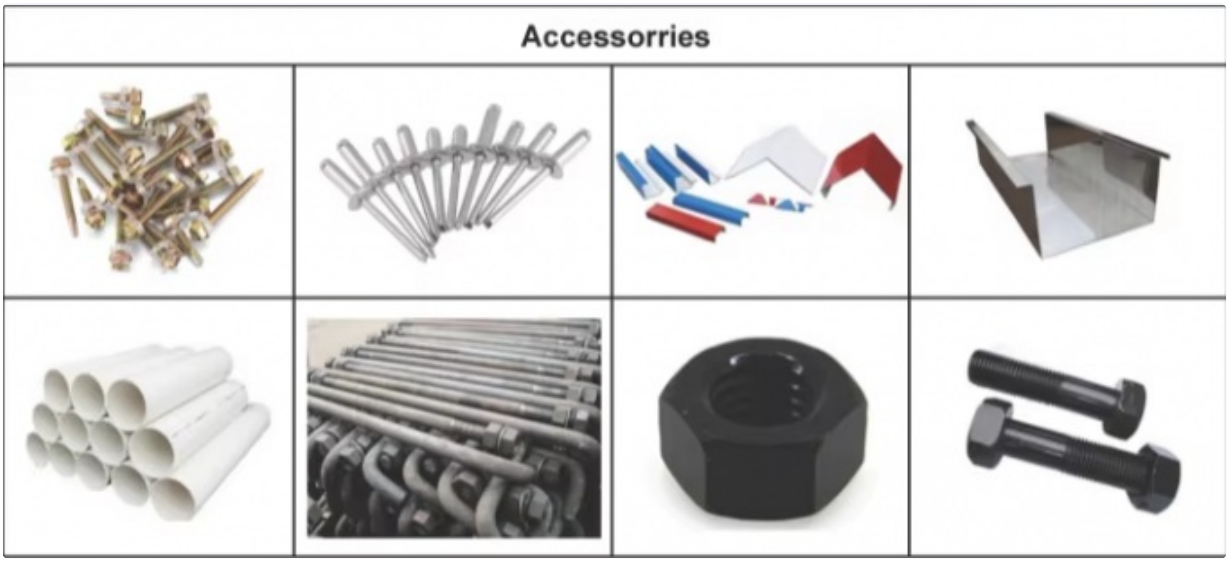

Tie & Column Connection

Applications

- Small product processing workshop
- Farm storage shed for agricultural supplies
- Private vehicle garage and maintenance shed
- Small business goods storage warehouse
- Equipment maintenance workshop
- Auxiliary storage building for factory

Customization Options

Space & Size Customization — Customize building length, width, height, and modular combination quantity.

Functional Structure Customization — Industrial crane brackets, ventilation systems, lighting systems, and fireproof isolation structures.

Appearance & Decoration Customization — Exterior wall color, roof style, door and window specifications.

Regional Performance Customization — Wind resistance, snow resistance, seismic resistance, and anti-corrosion upgrades.
